

Spring Lake Heights Water Customers

Water Utility personnel will be performing the scheduled

HYDRANT FLUSHING

Monday-Friday: 7 PM - 4 AM

September 20th – October 1st

During this period water is released from hydrants to remove sediment in the water distribution system.

If you experience discolored water, it is recommended that you run the cold water tap for a few minutes until the water clears. If it does not clear the first time, wait a few minutes and run the water again. The water is safe to drink but you should avoid washing clothes and dishes until the water clears.
